Dear Dr. Daniel Ginting,

Thank you for the submission of your paper to our journal. It has been assigned to a peer review.

We use a double-blind system for peer reviews. The paper will be peer-reviewed by at least two experts. The review process may take four to ten weeks. We will inform you of our decision and the reviewers' comments as soon as possible.

If you have any questions, please feel free to contact me.

Sincerely,

Joe Nelson

Comments from Reviewer A

❖ Evaluation (Please evaluate the manuscript by grade 1-5)	
5=Excellent 4=Good 3=Average 2=Below Average 1=Poor	
Items	Grade
Contribution to existing knowledge	1
Organization and readability	1
Soundness of methodology	1
Evidence supports conclusion	1
Adequacy of literature review	1
❖ Strengths	
There is novelty in this study. It can contribute to the current body of knowledge.	
❖ Weaknesses	
While the study shows originality, it failed to advance any aim and objectives to justify the need for investigation. It was not clear how this paper could contribute to the development of the participants involved or to the program itself. It was not clear if this paper has benefited from existing literature. It was not founded on any theory. The entire paper needs reorganization or restructuring based on the basic parts of a research study.	
❖ Suggestions to Author/s	
I made some suggestions embedded in the paper. If they wish to reorganize they can look at those comments for improvement.	

Comments from Reviewer B

❖ Evaluation (Please evaluate the manuscript by grade 1-5)	
5=Excellent 4=Good 3=Average 2=Below Average 1=Poor	
Items	Grade
Contribution to existing knowledge	4
Organization and readability	4
Soundness of methodology	4
Evidence supports conclusion	4
Adequacy of literature review	4
❖ Strengths	
Paper discusses current popularity of MOOC for Staff that can be learnt at their pace.	
❖ Weaknesses	
❖ Suggestions to Author/s

Ethical Guidelines for Authors

- The author should not submit concurrent manuscripts (or manuscripts essentially describing the same subject matter) to multiple journals. Likewise, an author should not submit any paper previously published anywhere to the journals for consideration. The publication of articles on specific subject matter, such as clinical guidelines and translations, in more than one journal is acceptable if certain conditions are met.
- The author should present a precise and brief report of his or her research and an impartial description of its significance.
- The author should honestly gather and interpret his or her research data. Publishers, editors, reviewers, and readers are entitled to request the author to provide the raw data for his or her research for convenience of editorial review and public access. If practicable, the author should retain such data for any possible use after publication.
- The author should guarantee that the works he or she has submitted are original. If the author has used work and/or words by others, appropriate citations are required. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.
- The author should indicate explicitly all sources that have supported the research and also declare any conflict(s) of interest.
- The author should give due acknowledgement to all of those who have made contributions to the research. Those who have contributed significantly to the research should be listed as coauthors. The author should ensure that all coauthors have affirmed the final version of the paper and have agreed on its final publication.
- The author should promptly inform the journal editor of any obvious error(s) in his or her published paper and cooperate earnestly with the editor in retraction or correction of the paper. If the editor is notified by any party other than the author that the published paper contains an obvious error, the author should write a retraction or make the correction based on the medium of publication.
