Dear Prof. Abiodun Falodun, PhD,

I/We wish to submit a new manuscript entitled "Bioactive potential of Cephalosporium sp. a fungal endophyte isolated from Phyllanthus niruri L." for consideration by the Tropical Journal of Natural Product Research.

I/We confirm that this work is original and has not been published elsewhere nor is it currently under consideration for publication elsewhere.

In this paper, I/we report on the cultivation of a fungal endophyte derived from Phyllanthus niruri Linn, which was identified as a Cephalosporium sp. The endophyte was subsequently extracted, fractionated, and evaluated for its total phenolic content, antimicrobial and antioxidant properties, as well as its potential as an anti-breast cancer agent against 4T1 cell lines. The dichloromethane fraction was found to be the most effective against Escherichia coli, while the methanol fraction exhibited the highest antioxidant activity. Additionally, the dichloromethane fraction was capable of inhibiting 4T1 cell growth at a non-toxic dosage.

Therefore, we hereby say that the research we are conducting is new. Tropical Journal of Natural Product Research is a very good journal and is able to publish articles on the use of endophytic fungus. Therefore, our article is suitable for publication in the Tropical Journal of Natural Product Research.

We have no conflicts of interest to disclose.

Thank you for your consideration of this manuscript.

Sincerely,

[Rollando]

Comments may be continued onto another sheet if necessary.  
 This research on endophytes presents an innovative approach in exploring the potential of endophytic fungi as a source of bioactive compounds. Endophytes are known to produce a variety of bioactive secondary metabolites that have the potential for use in various fields, including pharmaceuticals and agriculture. The researchers' focus on endophytes and their metabolites could lead to the discovery of new drugs or biocontrol agents with significant applications in various industries. Therefore, this study is highly commendable for its innovative exploration of endophytes and their potential applications.

Dear Editor in Chief,

I am writing to inform you that we have completed the revisions suggested by the reviewers on our manuscript entitled "Bioactive potential of Cephalosporium sp. a fungal endophyte isolated from Phyllanthus niruri L." We have carefully considered all the comments and suggestions made by the reviewers and have made the necessary revisions to improve the quality of our work.

We have attached a point-by-point response to the reviewer's comments along with the revised manuscript. We hope that these revisions address all the concerns raised by the reviewers, and that the manuscript is now suitable for publication in Tropical Journal of Natural Product Research.

We would like to take this opportunity to thank the reviewers for their valuable comments and suggestions, which have helped us to improve the quality of our work.

Please let us know if you require any further information or clarification.

Thank you for your time and consideration.

Sincerely,
